SIGNATURE SHAPE

Every model in our head protection line features our signature shape. The visors and vents may be different, but the profile is always the same. Turn to the front, side, or back and you'll know it's a Bern.

SIGNATURE FIT & FEEL

Bern Profile is complimented with a deep, surround signature fit and feel. Multiple shell sizes are available in most models to provide optimum balance between protection, profile and fit.

SIGNATURE STYLE

The Chine Line separates the top of the shell from the sides giving each model our signature fit. The lid ergonomically fits around your head instead of sitting on top of your head.
